

London Health Sciences Centre

Postdoctoral Fellowship–GE Healthcare/ Western/Robarts/ Lawson /LHSC -Medical Image Analysis and Visualization

One postdoctoral fellowship is available in GE Healthcare, London, ON, Canada.

The successful candidate will conduct cutting-edge research with leading researchers in GE Healthcare, the University of Western Ontario (Western), Robarts Research Institute, Lawson Health Research Institute, and London Health Sciences Centre (LHSC) in the field of medical image analysis and visualization. They will also gain opportunities to directly interact with radiologists for problem definition, solution development, and validation.

GENERAL REQUIREMENTS:

The successful candidate will be an excellent scholar having degrees (or will have) from computer science, electrical engineering, computer engineering, physics, medical biophysics, or an engineering discipline with an inter-disciplinary background in some of the following areas: image processing and visualization, computer vision, pattern recognition. The candidate will have a proven record in research, innovative thinking, real-world problem solving and fast prototyping.

For consideration, please send a cover letter, resume and three representative publications to: shuo.li@ge.com
Please mention “GE-London-Postdoc” in the subject line.
