

Research Scientist Position

Siemens Corporate Research, Inc. Imaging & Visualization Department

The Imaging and Visualization Department of Siemens Corporate Research (SCR) has immediate openings for a research scientist position.

In this position, the candidate will be conducting leading-edge research and development in one or more of the following topics: statistical modeling and estimation methods, machine learning and pattern recognition methods in medical image analysis with a focus on MR neuro-imaging applications.

Ideal candidates will have a Ph.D. in CS/EE/CE/BME/Math/Statistics with a proven record in research, innovative thinking, real world problem solving, and fast prototyping. Candidates should have advanced research experience in computer vision, machine learning, numerical and statistical computational methods in imaging and possess fast research prototyping abilities.

Candidates with solid background in imaging and visualization, and the desire and ability to learn new technologies and apply them to challenging problems will find a stimulating and rewarding career at SCR.
